ARCOM 2026 First Time Match Data

Residency placement analysis and national distribution

The PG1 records show 136 residency placements across 32 states and one research fellowship in Tennessee. Texas, Oklahoma, and Arkansas account for the largest numbers of residency placements. PG2 placements are excluded throughout.

Residency placements	States represented	Arkansas placements	Research fellowship

Leading states

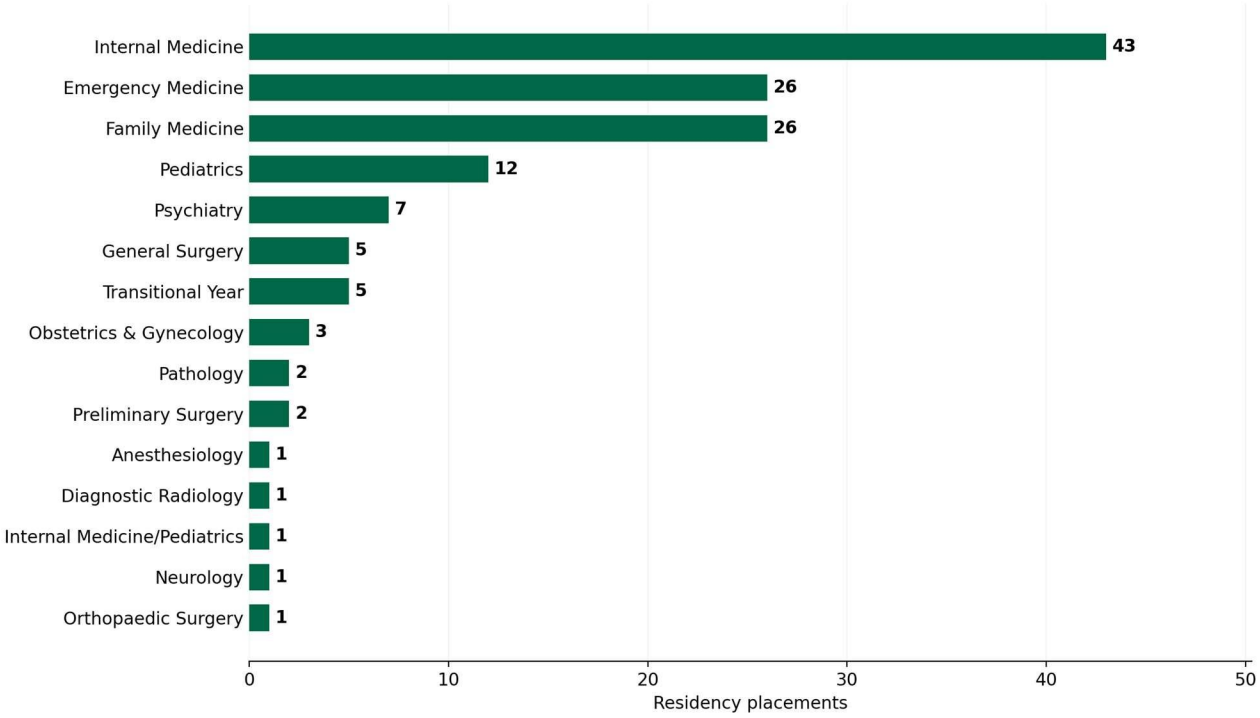

Primary care specialty grouping: 81 of 136 residency placements (59.6%) in Internal Medicine, Family Medicine, or Pediatrics. Including Medicine-Pediatrics, the total is 82 (60.3%). These categories describe residency specialties, not eventual practice outcomes.

Arkansas accounts for 14 of 136 residency placements (10.3%). The research fellowship is reported separately. A match rate cannot be calculated from this placement list alone.

First Year placements by specialty

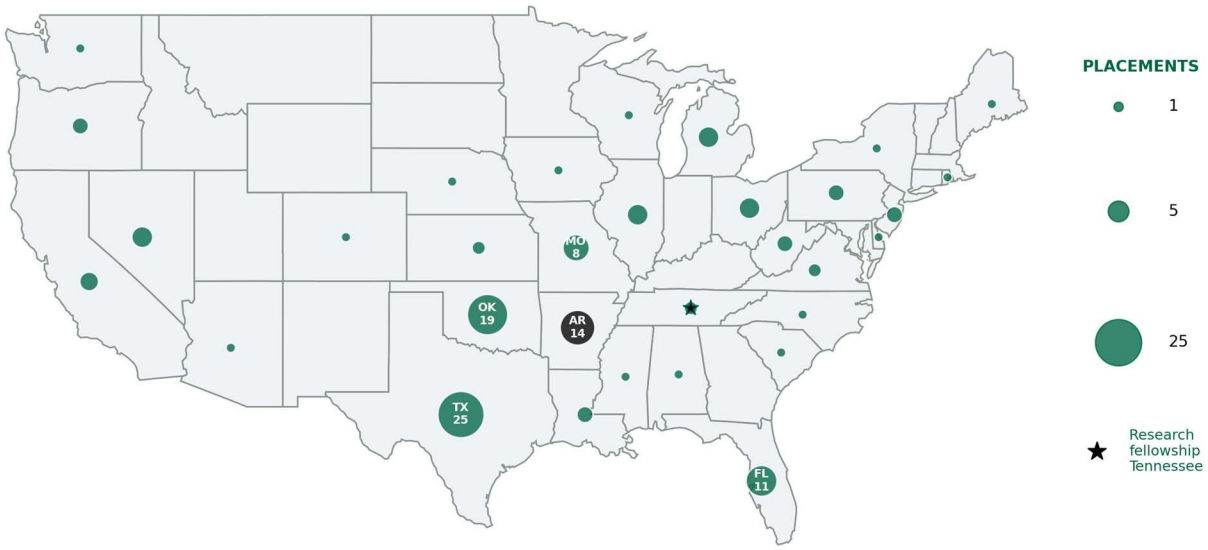

Internal Medicine has the most placements (43), followed by Emergency Medicine and Family Medicine (26 each). Transitional and preliminary years are shown separately.

Eight blank residency specialty fields were categorized using their PG1 program names. The truncated Family Medicine label was grouped with Family Medicine. Both Surgery-Preliminary program entries were grouped as Preliminary Surgery, including one recorded as Surgery-General in the specialty column.

National residency placement map

All 136 residency records are mapped by state. Bubble area reflects the number of placements; markers sit at approximate state centers rather than individual residency addresses.

Black bubbles highlight Arkansas. The black star identifies the separate Tennessee research fellowship; Tennessee also has two residency placements.
